OF

#### The Commonwealth of Australia

Compiled by C. R. Long, M.A., Author of "Stories of Australian Exploration." Size, 30 x 40 ins. Mounted on rollers and varnished. Price, 5/-. Postage within Victoria), 6d., to other States, 8d.

This Map has been supplied to all State Schools in Victoria, and is also used and recommended by the Education Departments in the other States. It is a LOCAL PRODUCTION, and should be hung in every school, and in the reading room of every Mechanies' Institute and Library in Australia. At a glance it brings vividly to the mind the way in which Australia was revealed to the civilised world by its discoverers and explorers—knowledge that should be put in the way of all young people.

The chief physical features of the continent are shown, the dates given when the capitals were founded, and the political divisions made. The map is in four colours—the land brown, the sea routes blue, the land routes red, and the outlines and lettering black.

## BILL BAILLIE

By MRS. ELLIS ROWAN.

With eight full-page Illustrations in colour and numerous black and white engravings in the text.

This is a charming story of a little-known Australian animal—the Bilboa.

Bill's adventures are told with mingled humour and pathos, and all readers of the book will fall as deeply in love with "Bill" as did Tabitha herself.

The coloured plates are from paintings by Mrs. Ellis Rowan, and add greatly to the beauty of the book.

THE ELEMENTS OF ANIMAL PHYSIOLOGY. By W. A. OSBORNE, M.B. D.Sc., Professor of Physiology in the University, Melbourne. 152 pages, 64 illustrations. 61-; postage, 4d.

In this book an attempt has been made to give an elementary account of physiology from the standpoint of the mammal and with special reference to man and the domestic animals. It is hoped that it may function as a text-book intermediate between the primer and the special manual of human or veterinary physiology, and therefore be of use to students of medicine, veterinary science, and agriculture. As the technical terms employed are all defined, and as no presumption is made that the reader has studied chemistry or physics, the book, it is also haved, may be read with profit by others who may not be extracted upon a definite course. hoped, may be read with profit by others who may not be entering upon a definite course professional study.

In the appendix a number of biochemical data are given for the sake of those who have

some chemical knowledge.

A copy should be in the hands of every intelligent person. It is the latest and best book on the subject.

"The book is trustworthy and free from errors; it is specially full on its biochemical side,

which is what one would anticipate from Professor Osborne's research work. . . wish the book the success it deserves."—Nature.

#### PREFATORY NOTE.

To the inventor of bibliographies, whoever he may have been, students the world over owe a deep debt of gratitude; he has given us one of the most efficient labour-saving machines of modern times. In whatever field, of literature or of science, we are working, we nowadays regard the aid of the bibliography as well-nigh indispensable.

The number of persons interested in the history and literature of the Commonwealth is rapidly increasing, and many of them must have felt, again and again, the need of a bibliography. The present catalogue is, so far as I know, the first serious attempt to meet this need, the first published contribution towards a complete Australian bibliography. It gives a complete list of Australian and Tasmanian publications which are still current—which are available, that is, without any haunting of the second-hand book-shops; and this is so manifestly a step in the right direction that one can but wonder why the step was not taken long ago. The value of such a catalogue to book-seller, bookcollector, and librarian is too obvious to be insisted on. Speaking as representative of none of these classes, but merely as a member of the growing body of persons who take an interest in our young literature, I wish the book had been published years ago; for it would have saved me from several long, laborious quests, which wasted one's time and tried one's temper.

WALTER MURDOCH.

### PUBLISHED MONTHLY.

PRICE: By subscription, in advance, 5s. per annum; or, Monthly Parts, 6p. each.

This is the official organ of the Agricultural Department. Its purpose is to lay the best procurable advice before the farming community—advice dictated by scientific investigation, combined with practical experiments. To keep the present occupiers of the soil informed as to all that is going on in other countries with regard to Agriculture, and to give them all the assistance that prompt information and scientific research can afford. It contains from time to time reports of experiments made and investigations conducted by the Department, which may be of special importance to any section of the agricultural community; also papers of special value, written by the Scientific Staff, or taken from kindred publications. It contains the latest news as to crops, pastures, weather, and rainfall, improved methods of working the soil, means of combating pests, effects of manures, drainage, and irrigation.

# DUCKS - AND DUCK=FARMING

BY

### D. S. THOMPSON,

Poultry Expert, Hawkesbury Agricultural College.

This Pamphlet on Ducks and Duck-farming is made up of articles which were specially written for the Agricultural Gazette for the information of poultry-farmers and other general farmers throughout the State. It shows that, from a utility point of view, it will pay well to farm ducks, and points out the most excellent breeds for profitable duck-farming. Very little capital is required to start a duck-farm in this State; our climate is so mild throughout the year that a large duck-farm could be started without buildings of any sort. A duck-farm could be started off with less capital than any other branch of agriculture. No farmer should be without a copy of this useful book.

# The Caves of New South Wales Official Guide-books.

BY O. TRICKETT, L.S., M.S.,
Of the Department of Mines and Agriculture.

THESE Caves, which are unrivalled for their beauty and the wealth, magnificence, and delicacy of their wonderful formations, contain treasure-houses which no dream of Eastern art can equal. They are situate among romantic surroundings, and the roads to them are remarkable for the grandeur of the scenery through which they pass.

Official Guide-books have been specially prepared to give intending visitors a concise Idea of the exquisite beauty and extent of the Caves. They are beautifully illustrated, and contain full information as to the routes thereto, and the coach and rail fares, and may be obtained at the prices hereunder named:

# Diseases of Fowls

By

G. BRADSHAW.

[SECOND EDITION.]

THE first edition of this important work was soon exhausted owing to the many applications to the Department of Agriculture "for something about the diseases of fowls." A second edition is now at press, authorised by the Hon. the Minister of Agriculture. It contains valuable additional information about the diseases and their remedies, and in case of contagious and infectious diseases the best information has been culled from the writings of the most eminent authorities and from the reports of English, American, and other Experiment Stations. Also, the American Poultry Journal, The Reliable, and the experts of the English Feathered World and Poultry have all been consulted, every remedy mentioned being of tested efficacy.

All persons connected with poultry culture should have a copy of this work, which, with the alphabetical arrangement, plates, charts, &c., is a handy and reliable book of reference.

# IRON ORE DEPOSITS

OF

## NEW SOUTH WALES,

By J. B. JAQUET, A.R.S.M., F.G.S., Geological Surveyor.

ROYAL 4to. 186 pp. WITH MAPS, PLATES, AND SECTIONS.

This volume is Memoir No. 2 of the Geological Series; it shows that in New South Wales there are Important Deposits of Rich Iron Ores, and Mr. Jaquet, who has made a careful survey of these deposits, points out the centres which, by reason of their proximity to [supplies of coal and limestone, may be regarded as suitable localities for the establishment of Smelting Works.

# Farmers' Fowls,

BY

## G. Bradshaw.

PUBLISHED BY AUTHORITY.

THE book on Farmers' Fowls, which is a reprint of articles from the Agricultural Gazette, is now published. It is a comprehensive work, embracing every phase of poultry-keeping, including locality, appliances, runs, coops, breeds, crosses, artificial and natural incubation, feeding, rearing, diseases, fancy and market poultry, &c.; causes of failure and other disappointments in the industry.

All farmers are recommended to obtain a copy of this work, as the agricultural farm is the ideal home for domestic poultry, where every known breed and variety can be reared, and where the success of the industry can be assured if carried on with fruit-growing or other various issues of the farm.

# Bulletin of the Imperial Institute.

## A LONDON PUBLICATION, PRICE, 1s.

(

The Imperial Institute at South Kensington was founded as the National Memorial of the Jubilee of Queen Victoria, by whom it was opened in May, 1893.

The principal object of the Institute is to promote the Utilisation of the Commercial and Industrial Resources of the Empire by arranging Comprehensive Exhibitions of Natural Products, especially of India and the Colonies, and providing for their investigation and for the collection and dissemination of Scientific, Technical, and Commercial information relating to them.

The "Bulletin" was printed to record the work of the Scientific and Technical Department of the Institute. The first two Volumes, 1903 and 1904, were issued as Supplements to the "Board of Trade Journal"; but the "Bulletin" commencing Vol. 3, 1905, is now issued for sale, at a cost of 1s., as a separate Quarterly Publication. In its present form, which deals largely with Colonial Products and Industries, it comprises reports of original investigations and general articles written by Specialists, on the Development and Utilisation of Economic Products, and it will be a record of progress in Tropical Agriculture. The Members of the Scientific and Technical Staff of the Institute contribute to the "Bulletin," and Officers connected with Agriculture, Forestry, and other Scientific Departments in the Colonies have promised their help.

The "Bulletin" should be especially useful to those engaged in Agriculture, Mining, and similar pursuits in the Colonies.

# Letters on the Diseases of Plants

(SECOND SERIES),

BY

N. A. COBB.

Illustrated with 150 Original Engravings and six coloured plates. Royal Svo.

This important work, which has just been published, should be of special interest to all Australian growers of fruits, vegetables, and flowers. It is a compilation from letters written in reply to correspondents of the Dapartment of Agriculture, and it contains the results of original investigations on the diseases of plants as they occur in Australia. The plain and practical descriptions of the various diseases of the many cultivated plants are given, together with the preventive and remedial measures appropriate to them. An extensive index is added.

## TESTING MILK AND CREAM,

TOGETHER WITH

MILK AND CREAM CHART FOR DAIRY FACTORIES AND FARMERS

[SECOND EDITION]:

BY

M. A. O'CALLAGHAN, DAIRY EXPERT.

Demy 8vo., 84 pp.

A SECOND and cheap edition of this important work, revised and up to date, is now published to meet a growing demand by our dairy-farmers for knowledge of milk and cream testing, and methods of payment.

The Cream Chart is most valuable to factories for calculation purposes, and if all factories pay on the basis laid down in the Chart, it will give to the farmer all the butter his milk or cream contains, which is one of the objects in view in publishing this work. The principal factories of this State are now paying on this chart. And the managers of these factories say that, especially during the export period of the year, the churn results agree so closely with the results as shown in the chart that they rarely leave any difference worth while at the end of a month's work.

## INDUSTRIAL ARBITRATION

## Reports and Records of New South Wales.

(Published under the direction of The Honorable the Attorney-General.)

Edited by the Registrar, G. C. ADDISON, Esq., Barrister-at-law, Sydney.

(Law Reporter, C. E. Weigall, Esq., Barrister-at-law.)

An Official Record of the proceedings before the Court of Arbitration, with the judgments of the Court and President and decisions of the Registrar; including a reference record of all matters incidental to registration of Unions, industrial agreements, and proceedings in the Court and before the Registrar.

This work is invaluable to persons included within the purview of this Act, and of special interest to all who are desirous of following the working of this new legislation for the settlement of industrial disputes.

## Commercial Fruits of New South Wales.

## The Apple.

By W. J. ALLEN.

This small book, which is a reprint of articles from the Agricultural Gazette, contains valuable information in respect to the cultivation of the Apple. The best advice is given as to the soil, the site, and laying out of an orchard, preparing the land preparatory to planting, the best varieties to plant, budding, grafting, pruning, manuring, gathering and storing fruit, and marketing; also the insect and fungus diseases of the Apple, and their remedies. It is illustrated with six coloured plates of the varieties which under a given set of conditions return the best results from a commercial point of view. The book, therefore, should be in the hands of the man who devotes the whole of his energies to the production of the fruit, and the farmer who desires to have a plantation of fruit-trees which can be depended upon to return a good profit for all the labour he can bestow upon it as a subsidiary line.

# Mineral Resources

## New South Wales,

BY

#### EDWARD F. PITTMAN,

GOVERNMENT GEOLOGIST, &C., &C., &C.

Issued by direction of The Hon. J. L. FEGAN, M.P., Minister for Mines.

THE Mining Industry is one of the most important factors in maintaining and increasing our National Wealth, and there are probably few countries in the world which have been endowed with such a diversity of Mineral Wealth in proportion to area as the State of New South Wales.

This volume is therefore published in order that an idea of the magnitude and variety of the Mineral Wealth of the State might be obtained without the labour of referring to a number of separate publications. It indicates the mode of occurrence of the principal types of Ore-deposits, and supplies for the use of the prospector a list of the known localities of the different economic Minerals.

Descriptions are also given of several Mineral Springs, and of the Artesian Water Supply.

Copiously illustrated, also Sketch Map of New South Wales showing localities of the principal Minerals.

# NEW SOUTH WALES PLANTS

BY

### J. H. MAIDEN,

Government Botanist, and Director of the Botanic Gardens, Sydney.

DEW SOUTH WALES is crying out for illustrations of her indigenous flora. Some have already been depicted, and the scattered volumes containing them would form a considerable and costly library. The object of the present work is to make a systematic beginning with such New South Wales Plants as have never been figured, or are depicted in works of such rarity as to be practically inaccessible, even to Botanists, in Australia. This work; which will be issued in parts, is written in a simple style, and analyses of the various plants are given. It should be invaluable to all persons who take a special interest in our native flora, and most useful to teachers and students.

# Celebrations, Sydney.

Compiled under the authority of the Prime Minister of New South Wales.

#### By J. J. KEENAN.

This book is published to provide an authentic record of the different functions which were held, extending over a week, to mark the birth of the Commonwealth. The superb and magnificent way in which the Inaugural Celebrations were carried out are well described, and full reports are given of the Receptions and Entertainments, the Processions and Demonstrations, the Decorations and Illuminations which comprised the many events in the national rejoicings. The book is rich with beautiful illustrations—Portraits of Her Majesty the Queen, the Secretary of State for the Colonies, the Governor-General and Lady Hopetoun, the Lieutenant-Governor, the Admiral, the Commonwealth Ministry, the State Ministry, distinguished visitors and leading public men; also interesting pictures of the Grand Procession, taken from many points of view, Harbour Scenes, and Street Decorations. A panoramic view of the Military Review on Centennial Park, in which 1,000 men, the flower of the Imperial Army, picked from the various corps, the Indian Contingent, and the Colonial Troops took part; and a panoramic view of the School Children's Display on the Sydney Cricket Ground. The book is a standard work of reference of this great historic event.

Government Botanist and Director, Botanic Gardens

THE object of this work is to depict the botanical characters of the various Trees and other Forest Flora indigenous to New South Wales, and to furnish available useful information with regard to their Timber and other products.

Some of our trees are remarkable for their beauty, and many of them are of great botanical interest, while others have already been proved to be of considerable economic importance. The work should, therefore, win a fairly general support; but more especially it will be useful to those engaged in the pursuits of forestry and the various industries connected with timber.

Issued in Parts, each containing Four Plates; about Eight Parts to be issued per annum.

## EDIBLE FISHES

OF

## NEW SOUTH WALES

THEIR PRESENT IMPORTANCE AND THEIR POTENTIALITIES.

### BY DAVID G. STEAD.

Naturalist to the Board of Fisheries, New South Wales.

DEMY 8vo. 119 pp. WITH MAP AND 81 PLATES.

THE FISHES OF NEW SOUTH WALES, from an economic standpoint, are at present of great importance; but this present importance is as nothing compared to their vast possibilities. Rich in a variety of fine edible forms, these waters are no less rich in quantity, and many of the species occur in such overwhelming abundance as to make their capture and treatment (in a commercial way) on a large scale, a comparatively simple matter for people of enterprise, knowledge, and resource.

This important work is, therefore, published to furnish reliable information of the whole of the known edible fishes inhabiting the waters of New South Wales. The book contains a map and eighty-one plates, photographic representations of the fishes. It was specially prepared for distribution at the Franco-British Exhibition, but a limited number of copies has been placed in stock for sale to those desirous of obtaining an authorised work on the subject.

### NATIONAL ART GALLERY

of New South Wales.

# Illustrated . . . Catalogue

Compiled and Edited by the PRESIDENT and the SECRETARY.

OUR NATIONAL ART GALLERY is rich in the possession of many great and beautiful works of art—oil paintings, watercolours, black and white drawings, sculpture, &c.—and is a delight and an education to all who visit it. The Catalogue is specially prepared for the use of Visitors for easy reference to the treasures of the Gallery. It gives the numbers and names of all the works; also the names of the artists who executed them, with short biographical notes of the most distinguished. It is beautifully illustrated with copies of the great pictures, the most notable being printed in colour fac simile. The book itself is a work of art, and a copy of it should be in every home to encourage everyone who takes a pride in our art treasures to visit the Gallery.

## Two Unique Maps

Designed and Compiled by E. W. COLE.

#### THESE UP-TO-DATE MAPS

ARE ENTITLED

#### "The Whole World at a Glance"

-AND-

#### "The Human Race at a Glance"

HE object aimed at in producing them is to convey instruction in an interesting, forcible, and concise form.

"The Whole World at a Glance" shows, in addition to the usual Geographical Map, the principal Railways, Telegraphs, Distances, Towns,

cipal Railways, Telegraphs, Distances, Towns, etc., and the Flag, Area, and Population of all the known countries in the World.

"The Human Race at a Glance" is a Map of a very distinctive character, showing the facial characteristics of most of all the known peoples on the face of the globe.

These Maps are hung in the Imperial Institute, London, the Federal and State Parliament Houses, Melbourne, the Council Chamber of the Melbourne Town Hall, the Melbourne Public Library, and Melbourne University, and letters of appreciation and thanks have been received from the principals of these Institutions.

Maps of this description, showing all the countries of the world, the population, faces, and flags of all nations, ought to interest every one, and no school or educational establishment should be considered complete without them.

The Maps are printed in 15 colours, they each measure 40 inches by 30 inches, and are mounted on canvas and rollers.

The Price of the pair is 21/-

#### JAMES COLLIER

(Formerly assistant to Herbert Spencer),
Joint-Author of "Descriptive Sociology"—English and French,
and Author of "The Literature Relating to New Zealand."
A Bibliography.

Adelaide "Advertiser": "As a practised writer and an expert in literature relating to New Zealand—to say nothing of his association with Herbert Spencer in some of the latter's researches—Mr. Collier was exceptionally equipped for his task. A word should be said for his easy yet forcible and graphic style, which makes the reading of these pages a pleasure even to those who may have started without any burning interest in the subject."

"Sydney Morning Herald": "Mr. Collier has produced a good and even a brilliant book and it deserves to be widely read."

## Explorers of EAST, CENTRE, and WEST of AUSTRALIA.

#### By ERNEST FAVENC.

EXPLORER, and AUTHOR OF

"The History of Australian Exploration,"
"The Geographical Development of Australia," "Tales of the Austral Tropics,"
"The Secret of the Australian Desert," &c., and "Voices of the Desert" (Poems).

With Introduction by SIR JOHN FORREST.

"The Story of Australian Exploration could not have been entrusted to more competent hands, as Mr. Favenc, besides being an explorer himself, is a good writer, and the author of a large work on "The History of Australian Exploration." With these qualifications he has written a book of moderate size that should be read by everybody who is interested in one of the most stirring chapters in the annals of geographical discovery."—Australasian.

The Bulletin says:—"This book gives in compact form and with a profusion of excellent photographs and maps, the achievements of our early explorers. It is a book that can be strongly recommended to all Australians."

The Advertiser, Adelaide.

"A charming volume. The writer of these pretty and engaging fairy tales has received the admirable aid of many illustrations by Miss Ida Rentoul. . . . Reflects distinct credit on all concerned."

—The Age.

"A delightful Christmas gift book for young people in other lands as well as in Australia."—The Argus.
